

BANK MISR — FOR STAFF ONLY

Fraud Awareness Circular — March 2025

Risk Management Division | Internal Staff Circular

SUBJECT: Rise in Social Engineering Fraud — Staff Advisory

The Risk team has identified a significant increase in social engineering attacks targeting branch staff. Fraudsters are posing as CBE inspectors, IT support staff, or senior management to obtain customer account information.

Key Tactics Being Used

1. Phone calls claiming to be from the IT helpdesk asking staff to share their system login credentials for a 'security audit'.
2. Fraudsters presenting fake CBE ID cards and demanding access to customer account details without following the standard verification protocol.
3. Emails with spoofed Bank Misr addresses containing malicious attachments.

Staff Must Never

- Share login credentials with anyone, including IT staff (they do not need them).
- Access a customer's account without the customer being physically present and verified, or without a documented service request.
- Confirm customer account information over the phone without full verification.

Report any suspected social engineering attempt immediately to: fraud.alert@banque-misr.com (internal) or call the Fraud Hotline ext. 9911.
