Internal Audit Report: Retail Branch Operations Q4 2024

Prepared by: Internal Audit Department

Classification: Confidential — For Management Use Only

Executive Summary

The Internal Audit Department conducted a comprehensive review of retail branch operations across 14 branches in Cairo and Alexandria during Q4 2024. The audit identified 3 high-priority findings, 7 medium-priority findings, and 12 low-priority observations.

High Priority Finding 1: Cash Reconciliation Controls

Four branches were found to have gaps in end-of-day cash reconciliation procedures. This creates an unacceptable risk of undetected cash discrepancies. Immediate remediation is required.

High Priority Finding 2: Customer Onboarding KYC Gaps

Review of 200 randomly selected account opening files revealed that 18 files (9%) were missing mandatory source of funds documentation. This is a regulatory non-compliance risk under CBE AML regulations.

This report is confidential. Distribution is restricted to the Board Audit Committee, CEO, CFO, and relevant department heads only.
